

“Stefan’s genealogy research skills are impressive. He is very professional, responsive to questions and communicates well in English. He did not start with much more than my grandfather’s name (Meyer), his parent’s first names and the Guben “stadt” of Germany. He was able to trace my genealogy descendants back to the mid 1700’s over a 4 month period.

Even though many records had been lost, Stefan was persistent in tracking down and piecing together enough information (births, confirmations, marriages, deaths, newspapers) to build a genealogy history. Even better, I gained some knowledge of the history/customs of that area of Germany and the occupations of these descendants. I really appreciate the pedigree chart (in color) that Stefan has included. What a nice visual. Stefan also sent me a copy of each Archive record pertinent to my family research.

I highly recommend Stefan for any research in Germany and Western Poland. He will find/investigate what can be found. He sets a high standard for anyone to follow!
